BANK LOAN REPORT

This report aims to provide insights into key loan-related metrics and their changes over time. The report will help us make data-driven decisions, track our loan portfolio's health, and identify trends that can inform our lending strategies.

In this we have created some KPI'S like Total Loan Application's , Total Funded Amount's , Total amount received, total Interest Rate and Avg. Debt-to-Income Ratio.

In order to evaluate the performance of our lending activities and assess the quality of our loan portfolio, we have created a comprehensive report that distinguishes between 'Good Loans' and 'Bad Loans' based on specific loan status criteria.

In this project, we aim to visually represent critical loan-related metrics and trends using a variety of chart types. These charts will provide a clear and insightful view of our lending operations, facilitating data-driven decision-making and enabling us to gain valuable insights into various loan parameters.
